

A simple, sustainable way to nourish your plants.

Crafted from responsibly sourced poultry manure and refined through a natural enzyme fermentation process, it enriches soil with nutrients, humic substances, and beneficial microorganisms.

Each teabag releases organically derived nutrients to support healthy growth, vibrant foliage, and long-term soil health.

SPROUT**

Organic Fertiliser Teabags

Guidelines for use

Brew a rich organic infusion, then simply feed your plants

1. Place one teabag into your watering can
2. Fill with 2–5 litres of cold water and let it steep for 24 to 48 hours
3. Gently stir during brewing for best infusion
4. Apply directly to the soil. For optimum results, use immediately after brewing

Suitable for soil drenching or use as a gentle leaf spray first thing in the morning on a dry, breezy day.

Use weekly or whenever your plants need a boost. Suitable for houseplants, flowering & ornamentals, fruit & vegetable plants, containers & hanging baskets, potted plants and garden beds.

MADE IN THE United Kingdom

TOP TIP

Don't toss your used teabags! Open the bag and sprinkle the organic matter onto the soil surface as a natural top dressing.
